SCHEDULE GSM-16

Replacing Schedule INITIAL Sheet _____

which was filed INITIAL

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 1 of 3 Sheets

GENERAL SERVICE MEDIUM

APPLICABILITY

Applicable to all electric service of a single character supplied at one (1) point of delivery and used for general business or commercial purposes, institutions, public or private, and purpose for which no specific rate schedule is provided. This rate is applicable to service of over thirty (30) kW but less than two hundred (200) kW of demand. If a demand of two hundred (200) kW or over is reached once during a twelve (12) month period, service will be changed to the applicable rate necessary to accommodate the load. This schedule is not applicable to temporary, breakdown, standby, supplementary, resale, or shared service.

TYPE OF SERVICE

Three-phase, sixty (60) cycles, at available voltages, unless otherwise approved by the Cooperative.

MONTHLY RATE

Service Access Charge: \$50.00/mo.

Demand Charge: \$12.00/kW

Energy Charge: \$0.07450/kWh

An additional monthly charge for new service installations may be required as determined by the line extension policy of the Cooperative's Rules and Regulations.

ELECTRIC SPACE HEATING

Consumers will be required to install separate metering equipment for all approved permanently installed thermostatically controlled electric space heating and optional water heating of at least 10 kW connected load.

SCHEDULE GSM-16

Replacing Schedule INITIAL Sheet _____

which was filed INITIAL

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 2 of 3 Sheets

ELECTRIC SPACE HEATING - continued

Monthly kWh usage recorded by the separate metering equipment will be billed at the rate of \$0.07204 per kWh and will be subject to the power cost adjustment during the winter billing period. During the winter billing period, the separate heat meter will be exempt from the kW demand charges. The winter billing period shall be November through May. For electricity used during other periods, the demand and kWh on the separate circuit shall be combined for billing purposes with other electric service supplied and billed at the applicable rate.

THIS SECTION IS FROZEN: Where the Customer has installed and regularly used electric space heating of thirty percent (30%) or more of the total connected load prior to the effective date of this tariff, and where such equipment was not separately metered, the demand used for billing purposes in the winter billing period (November through May) shall not exceed the highest similarly established in the next preceding summer billing period (with the billing period of June through October).

BILLING DEMAND

The billing demand shall be the maximum average kW load used by the Consumer for any period of fifteen (15) consecutive minutes during the month for which the bill is rendered, as directed or recorded by the Cooperative's demand meter.

POWER FACTOR

If the average power factor for the month (determined at the option of the Cooperative by permanent measurement or by test under normal operating conditions) is found to be less than eighty-five percent (85%), the billing demand will be adjusted by multiplying by eighty-five percent (85%) and dividing by the average power factor expressed in percent.

POWER COST ADJUSTMENT AND PROPERTY TAX RIDER

The energy usage is subject to the Power Cost Adjustment and Property Tax Rider clauses.

No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 3 of 3 Sheets

MINIMUM CHARGES

The minimum monthly charge under the above rate shall be the Service Access Charge plus highest of the following:

1. The Demand Charge;
2. \$1.00 per KVA; or
3. As determined by the Electric Service Agreement.

CONDITIONS OF SERVICE

1. If the Cooperative deems it advisable, motors in excess of twenty-five (25) horsepower must be equipped, at the Consumer's expense, with reduced voltage, full magnetic motor starters.
2. All loads in excess of thirty (30) kW shall be served three-phase unless otherwise approved by the Cooperative.
3. If the service agreement stipulates that service is to be delivered at primary distribution voltage (Consumer transforming to the desired voltage of utilization), the Consumer's kWh charge and Demand Charge will be reduced by either one percent (1%) for secondary metering or two percent (2%) for primary metering. The Cooperative shall have the option of metering at either the primary or the secondary voltage. If the minimum bill is based on the required transformer capacity, a similar discount will apply on the minimum bill.

TERMS OF PAYMENT

Payment shall be in accordance with the Rules and Regulations of the Cooperative as they currently exist or may be amended from time to time.
